

## **Statement of Intent as to Environmental Impact**

Climate change and environmental degradation has a deleterious impact on everyone but a disproportionate impact on those who are at risk of becoming part of the refugee or asylum-seeking population. As a charity providing support, services and practical assistance to refugees and asylum seekers RRN is committed to the idea that in caring for those we help we must also care of the environment they live in. As a consequence, RNN will keep any negative impact on the environment of its activities as low as possible and where feasible make a positive environmental impact.

The Board of Trustees has appointed Emily Mott to be the trustee who leads the Board on environment matters and she will report annually to the Board of Trustees on the progress made in this regard.
